

The Iraqi Oil Field Reconstruction Plan

DSI has formed the Iraqi Construction Team to support the reconstruction of Iraqi oil fields. This team is made up from top Iraqi oil field professionals who worked extensively in Iraq.

Our vision is to reconstruct Iraq oil industry in all segments of the business from exploration to production and refining.

We have a methodological process to address Iraq immediate and urgent needs and long term energy exploitation plans. Our 8-year plans address the following:

- **Reservoir management strategies**
- **Assess data inventory, IT structure, electronic information capture and recovery**
- **Comprehensive reservoir analysis measurements, characterization, and modeling**
- **Training and human resources development**
